

main.c

Output

```
1  #include <stdio.h>
2  #include <ctype.h>
3  int main() {
4      char ch;
5      printf("Enter an alphabet: ");
6      scanf(" %c", &ch);
7      char upper_ch = toupper(ch);
8      if (!isalpha(ch)) {
9          printf("%c is not an alphabet\n", ch);
10     }
11     else if (upper_ch == 'A' ||
12              upper_ch == 'E' || upper_ch ==
13              'I' || upper_ch == 'O' ||
14              upper_ch == 'U') {
15         printf("%c is a Vowel.\n", ch);
16     }
17     else {
18         printf("%c is a Consonant.\n",
19                ch);
20     }
21     return 0;
22 }
```

main.c

Output

Enter an alphabet: a
a is a Vowel.
