

main.c

Output

```
1  #include <stdio.h>
2  #include <string.h>
3  int main() {
4      char str1[100] = "Hello, ";
5      char str2[] = "World!";
6      printf("String 1: %s\n", str1);
7      printf("String 2: %s\n", str2);
8
9      strcat(str1, str2);
10     printf("Concatenated String: %s\n",
11            str1);
12     return 0;
13 }
```

main.c

Output

```
String 1: Hello,
String 2: World!
Concatenated String: Hello, World!
```
