```c
1  #include <stdio.h>
2  int main() {
3      int numbers[] = {1, 2, 3, 4, 5, 6, 7
           , 8, 9, 10};
4      int size = sizeof(numbers) / sizeof
           (numbers[0]);
5      int even_count = 0;
6      int i;
7      for (i = 0; i < size; ++i) {
8          if (numbers[i] % 2 == 0) {
9              even_count++;
10         }
11     }
12     printf("Total number of even
           elements: %d\n", even_count);
13     return 0;
14 }
```

Total number of even elements: 5
