```c
1  #include <stdio.h>
2  int main() {
3      int numbers[] = {10, 20, 30, 40,
             50};
4      int size = sizeof(numbers) / sizeof
             (numbers[0]);
5      int i;
6      printf("The elements of the array
             are: ");
7      for (i = 0; i < size; ++i) {
8          printf("%d ", numbers[i]);
9      }
10     printf("\n");
11     return 0;
12 }
```

The elements of the array are: 10 20 30 40 50
